Form
Tab

(Import Form Data): You can import form data from XML, FDF or XFDF file which was exported from other PDF file.

(Export Form Data): You can export the form data in your PDF file to a XML, FDF or XFDF file.

(Text Field): You can create a text field which lets the users type in text, such as name, address, phone number, etc.

(Signature Field): You can create a blank digital signature field for reviewers to sign the document.
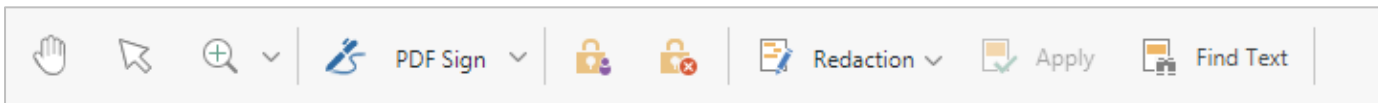

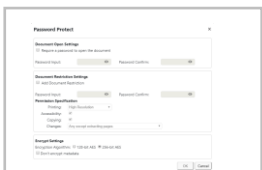

You can protect your PDF files by signature, password, and redaction.

Sign here!
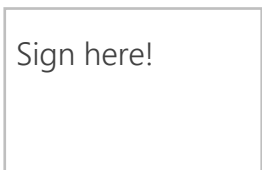

(Try to add signature into the above box)

(Ink Signature): The ink signature tool allows you to draw your own style signature and place it on your document. You can create a list of signatures for different use cases.

(Password Protection): You can add a password to a PDF to limit access and restrict certain features, such as printing, copying and editing.

(Redaction): The redaction tool enables secure and irrecoverable removal of sensitive, confidential or privileged text or graphics from PDF document. You are able to mark the text or graphics for redaction first, and then apply the redaction.

Bookmarks Panel

Comments Panel

Page Thumbnails Panel

PDF Layers Panel

Search Panel

Form Panel

Bookmarks Panel is used to add, remove and manage bookmarks. Bookmarks are useful for users to mark a place in a PDF file so users can return to it with ease.

Comments Panel displays all comments in the PDF so that users can easily view and find the comments.

Page Thumbnails Panel is used to view page thumbnails and re-order PDF pages.

PDF Layers Panel is used to show or hide related content stored in a variable number of separate layers.

Search Panel is used to quickly find specified text that you are looking for.

Form Panel: is used to manage form fields.
